
****WARNING!** Sherwood Dungeon Pet Hack v.1.0 may result in the following: Illegal entry into the world of Sherwood Dungeon, unsafe alteration of in-game data, illegal access to in-game characters, development/discovery of exploits which could damage both the game and player account** This post is for players who are playing "Sherwood Dungeon" and want make their character look better without spending any RL cash. This is not a cheat or exploit guide but rather an information post on how to get pets without hacking RL cash out of your pocket. Now, you may ask "why not just buy the pet with the RL cash?". The answer is simple: Pets don't stay! When it comes to pets, a limited amount of time is given to them when they are in your possession. Pets can come and go at any time. So, if you have a really cute pet, you want to hold onto it for as long as possible. By using this method, pets can stay much longer than they would normally be able to in the game. This pet hack is strictly for PETS ONLY! If you decide to use this guide to gain access into the account of another player then I am not responsible for what happens next. What you do with the information provided here is your own free will. I am shouldering no responsibility whatsoever. This guide will be strictly for the use of players who have legally purchased the game I have signed under this post. Should you use this guide for any misuse other than its intended purposes then I will see that serious legal action is taken upon you and your account. I am not responsible for any illegal activity that may be used with this hack which could result in damage to the player account and/or loss of their player data. The same rules go with using it to access another players account without their permission: DO NOT DO IT! Just because you can doesn't mean you should. It's not worth what you'll be doing in the long run, if you get caught. If you are willing to take risks and play your game with legalities in mind, then continue reading the guide below. For better or for worse, this is all up to you. If you decide to use this guide for your own personal gain then that's on you. We can't help anyone here but ourselves. This is for players 13+ years of age only! Any younger than that shouldn't be reading this information at all (if they can even read). By taking the time to read this guide, you are stating that you agree to the below terms and conditions. (Article Update 1) This translation is made for saving space. It might contain mistakes like incorrect judgement or inappropriate word choice. If you notice any mistake, feel free to PM me or make a discussion about it here. Please patch the game version on your game (for example: Game Version: V1.3). If your game version is older than it should be, consider updating your game version. If you still encounter bugs after updating the game then check out this guide here too (it worked for me). Warning! Many things can happen when using [Sherwood Dungeon Pet Hack].
